Let's Plant a Tree

By Patty Shukla

Chorus

Let's plant a flower, let's plant a tree
Let's plant a fruit, for you, for me. (Twice)

Mom took me to the store today
To buy some seeds and dirt
And when we got home we dug a big hole
And got right to work
We buried the seeds inside the ground
And watered them with a hose
I couldn't believe how easy it was to make something grow.

Chorus

I watered the ground every other day
And suddenly on the 11th of May
A bud sprouted high up in the air
All I could do was stop and stare
Every day it was something new
It grew and it grew and it grew
Now after two months I can see
Fruits for me on my beautiful tree

Chorus

I know it takes more than one
To give us food and oxygen
But together we can live long
And planet earth will get strong- strong

Chorus
